

SENATOR MOORE: Well...

SENATOR ABBODD: Now be honest, we're on the record.

SENATOR MOORE: Well, would I like for it to go away?

SENATOR ABBODD: Uh, huh.

SENATOR MOORE: Would I like for the fee increase to go away? Yes. But I that in any way, shape or form possible, probably not, unless we have a magic carpet that makes computers free in the state.

SENATOR ABBODD: Okay.

SENATOR MOORE: I mean, honest, the best I can be. I don't think it can go away or at that point in time we're going to General Fund it. I mean the cost is going to be the one way or the other I think.

SENATOR ABBODD: Okay. Have you estimated or has the fiscal office estimated an operating expense cost for these computers?

SENATOR MOORE: Well the fiscal office hasn't. I mean, the Supreme Court Administrator, he wanted five, but I mean they were arguing that four may not cover it, but I mean the ongoing operating cost, depending what the on line charges are and things like that, it's going to be around a million, one, six it looks like.

SENATOR ABBODD: On the annual basis operating expenses?

SENATOR MOORE: Yes, because as it's drafted now, as we now stand, there is a \$1.1 million from DAS, that's basically your computer charges. There's the terminal and printer leases. Those are going to be rolled over. Those are going to continue and in support, support, you're talking about a computer project in 93 counties, that's going to have to be there and the communication cost which is basically your on line charge of your telephone charges. All those things are going to continue in some shape or form.

SENATOR ABBODD: Is there a separate bill right now that provides for some sort of automation? Is this the only bill that provides for that? I was noticing LB...is there any other
